### Financial planning

As a first-year scholarship student, it is crucial to develop a realistic, well-structured financial plan. This will help you understand your expected costs, manage your budget effectively, and make informed decisions throughout your four academic years. Start filling in your expected monthly budget (page 3) to gain a more detailed insight into your costs and income (page 2). When completing the financial planning form, please keep the following suggestions in mind:

- > Use average costs where possible.
- > Provide a realistic estimate of your income.
- > Differentiate between fixed and variable costs.
